

We are seeking a Research Associate to join the Signal Processing and Networks Research Group at Loughborough University. The post is for two years and funded by the British Council - UK-Gulf Institutional Link Grant. The successful candidate should be prepared to travel to the partner King Saud University in Saudi Arabia, for workshops and short term visits.

Applicants should be highly motivated and have a first or upper-second class BSc/BEng degree and a doctoral degree in computer networks, network security, electronic engineering or similar related field. Research experience in computer network monitoring and analysis, Linux, Python, C or similar language are essential. Familiarity with distributed algorithms, on-line machine learning, convex optimizations and game theory would be an advantage.

For informal discussion, please contact Dr. Konstantinos Kyriakopoulos
