

Metabolic & Protein Networks in Systems Biology

MARIA I. KLAPA

Metabolic Engineering & Systems Biology
Laboratory
FORTH/ICE-HT, Patras, Greece

Metabolic Engineering:

Don't forget pathway connectivity and bioprocess control!

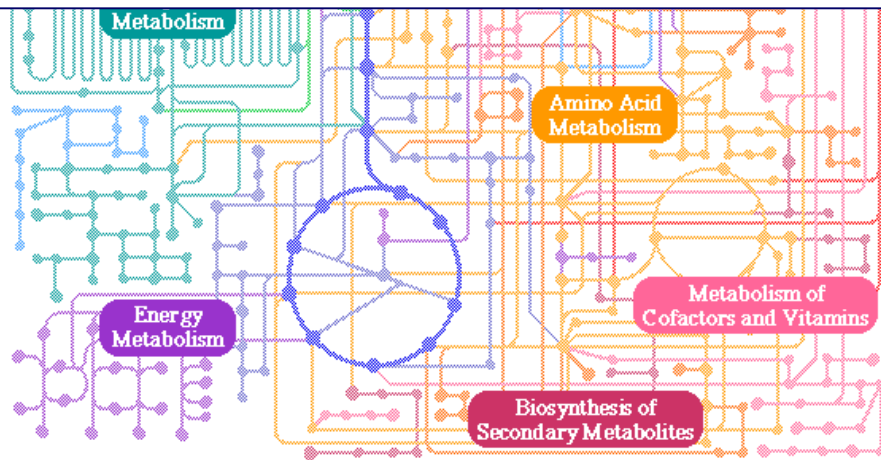

METABOLIC PATHWAYS

Metabolic Network Analysis

Systemic Analysis – Holism

Emerging Properties through Biomolecular Interactions

01100 7/5/02

Toward a science of metabolic engineering
JE Bailey

Science 21 Jun 1991 Vol. 252 pp. 1668-1675

Application of recombinant DNA methods to **restructure metabolic networks** can improve production of metabolite and protein products by **altering pathway distributions and rates**. ... Although some of the experimental and mathematical tools required for rational metabolic engineering are available, **complex cellular responses to genetic perturbations can complicate predictive design**.

Metabolic Pathway Rate/Flux

Multi-tissue metabolomic analysis in an AOH mouse model

AOH induction

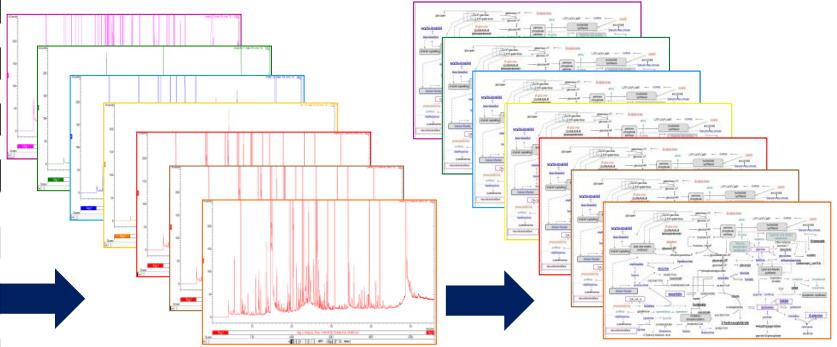

5 Brain Regions:
 Cortex (~180mg)
 Midbrain (~70mg)
 Cerebellum (~50mg)
 Hippocampus (~10mg)
 Striatum (~10mg)

Liver (~980mg)

Heart (~150mg)

MS-Metabolic Profile

Metabolic Network Reconstruction & Analysis

5 Brain Regions:
 Cortex (~180mg)
 Midbrain (~70mg)
 Cerebellum (~50mg)
 Hippocampus (~10mg)
 Striatum (~10mg)

Liver (~980mg)

Heart (~150mg)

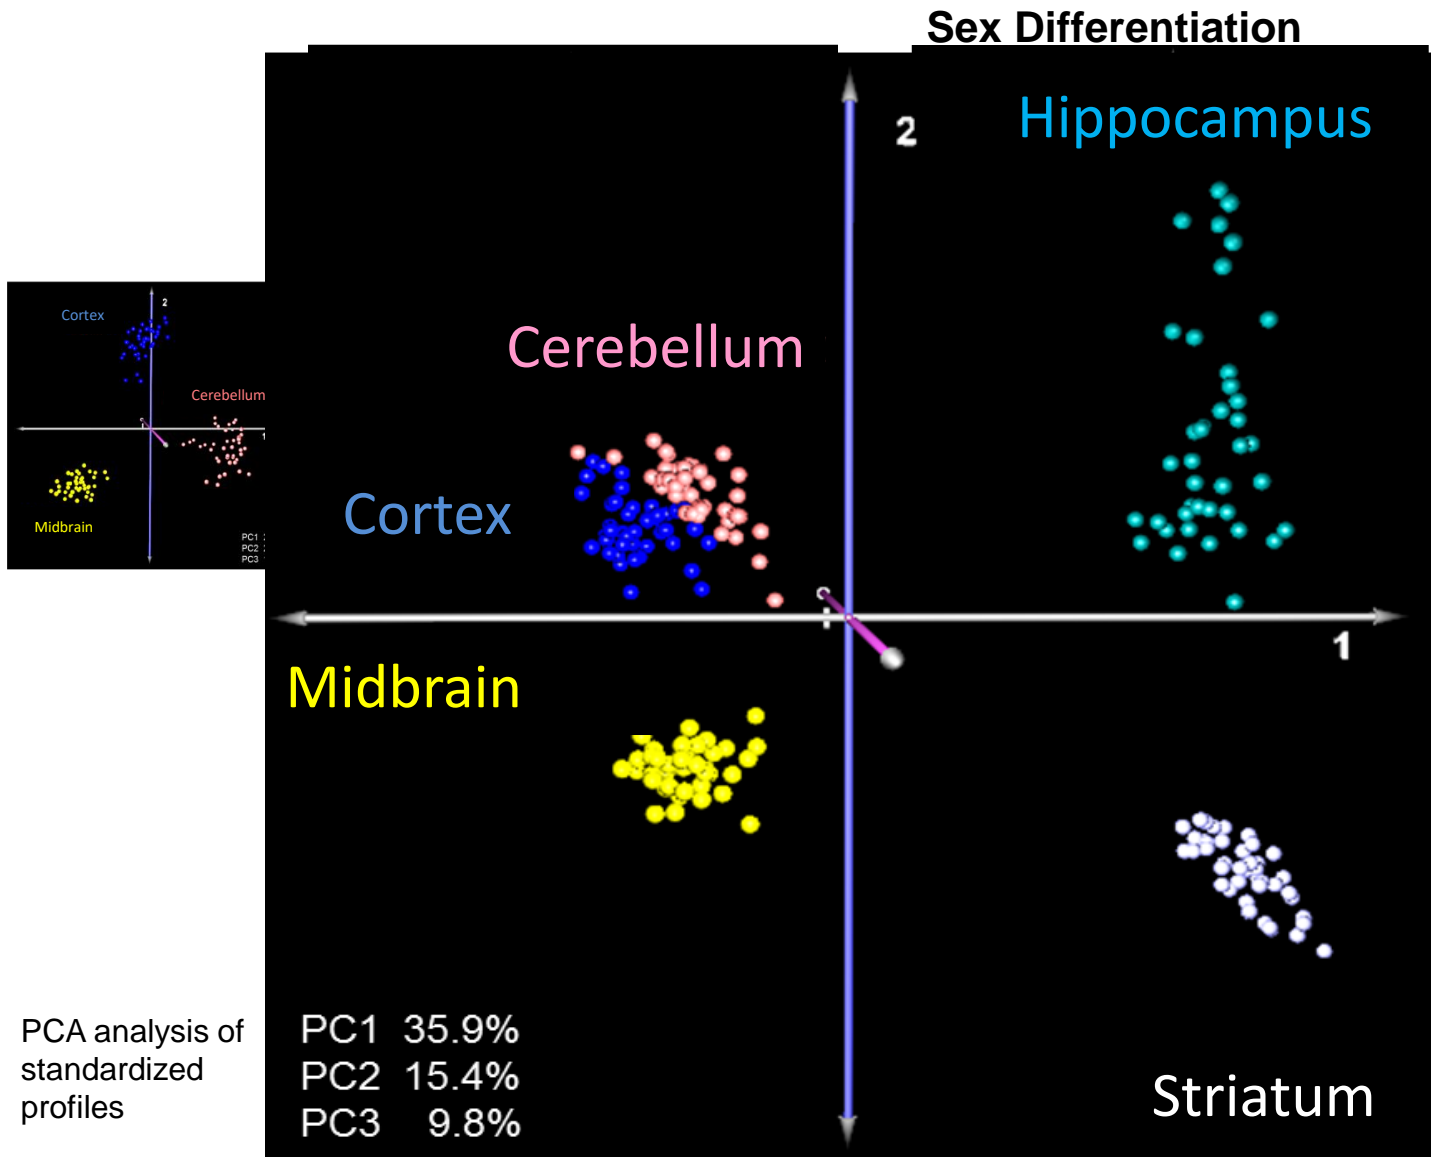

Multi-tissue Metabolic Physiology Characterization

POSTER F20

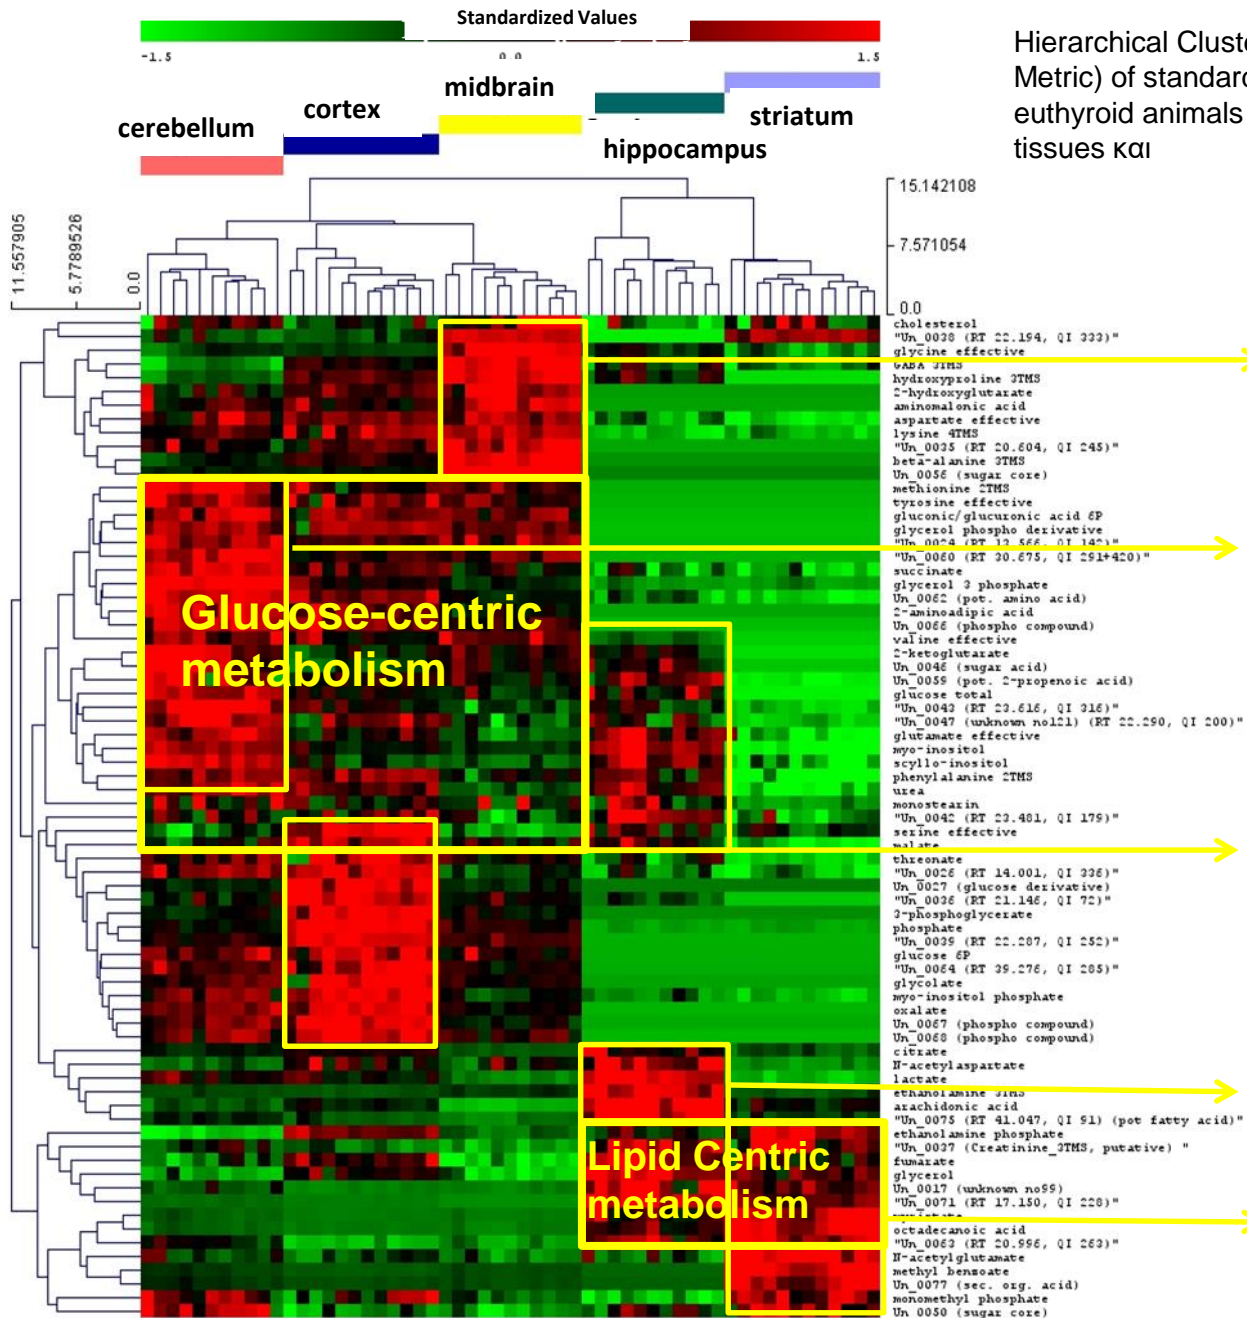

Total: 91 animals

Animal Group	KClO ₄ Treatment duration: 45 days		KClO ₄ Treatment duration: 60 days	
	Non-perfused tissues	Perfused tissues	Non-perfused tissues	Perfused tissues
Euthyroid Male (E_M)	6	6	6	7
Hypothyroid Male (H_M)	7	7	5	6
Euthyroid Female (E_F)	6	6	6	6
Hypothyroid Female (H_F)	5	4	4	4

Metabolic Differentiation between brain regions (1)

Metabolic Differentiation between brain regions (2)

Hierarchical Clustering (Euclidean Distance Metric) of standardized metabolic profiles of euthyroid animals in both sexes in non-perfused tissues ka1

- Glycine, GABA, cholesterol

- Glycolysis and glycerol and inositol metabolism
- Glutamic acid and urea as nitrogen storage compounds
- Aromatic Amino acids

- Phosphoric acid and phosphates
- Oxalic and threonic acid → antioxidant defense

- Arachidonic acid, N-acetyl-aspartate, ethanolamine

- Lipids
- Methyl-benzoate, N-acetyl-glutamate

M-IOLITE

FORTH

INSTITUTE OF CHEMICAL ENGINEERING SCIENCES

An integrated software suite for
GC-MS metabolomic analysis streamlining
(<http://miolite2.iceht.forth.gr>)

1

A standardized repository for GC-MS metabolomic data based on a reviewed library of >900 metabolite peaks

2

Specialized GC-MS metabolomic data normalization & filtering methods

3

Unknown metabolite identification methods based on metabolic network reconstruction & analysis

Investigating the genetic architecture of diseases

Reconstructing the diseasesomes

Poster F19

Diseaseome 2

Two diseases are linked if their associated proteins interact

Evridiki - Pandora Tsare

~98% of diseases are causally associated with proteins that are at most second neighbors in the human protein interactome

Ευχαριστώ!
Thank you!

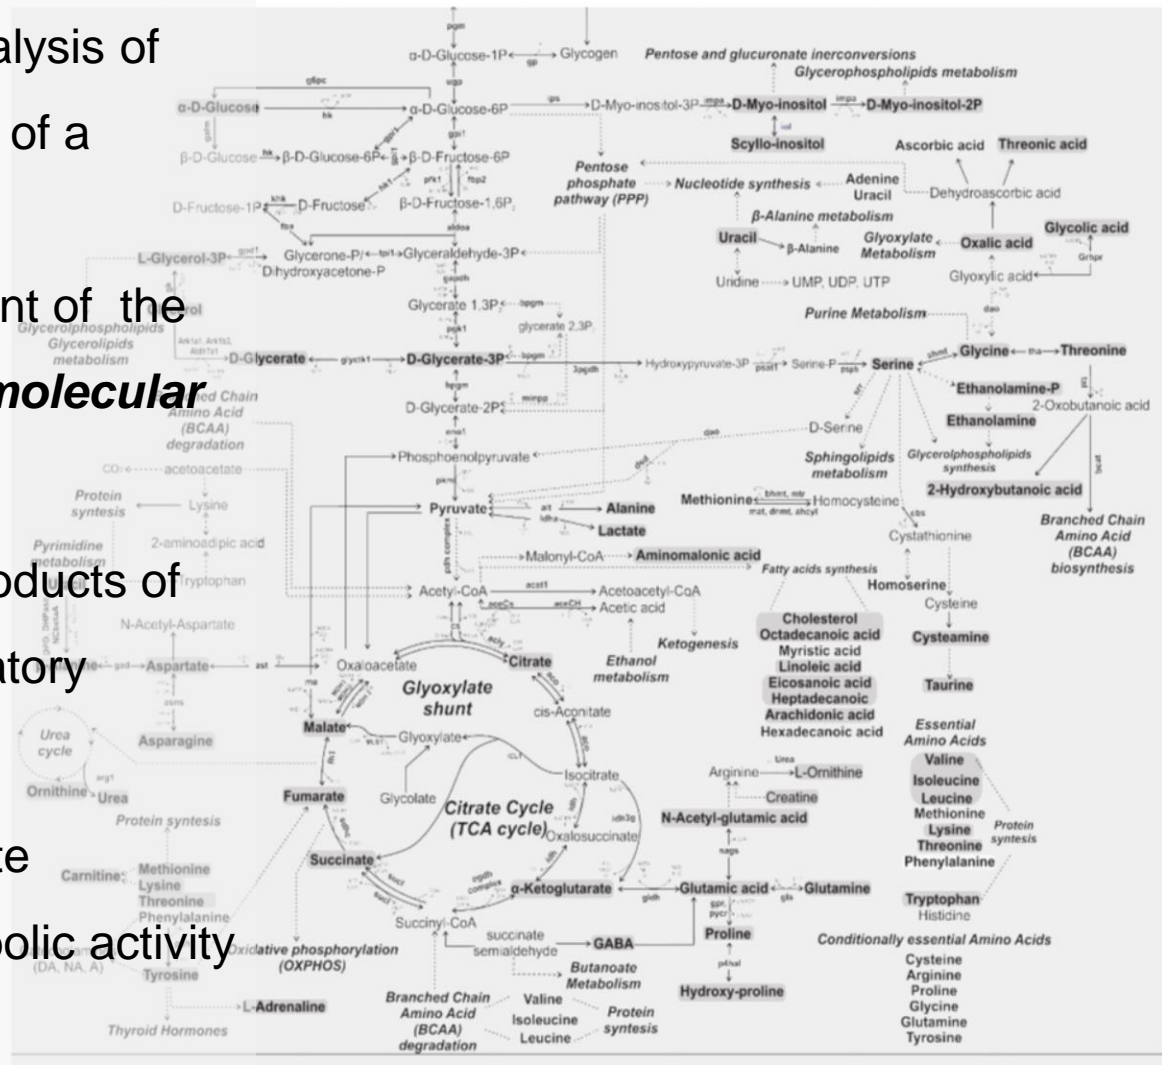

Untargeted metabolomics in Systems Biology...

...is the *high-throughput* analysis of the *metabolic network state* of a biological system through the simultaneous measurement of the *concentrations* of free *low molecular weight metabolites*

Metabolites: Reactants & Products of Metabolic Reactions – Regulatory Molecules of Protein Activity

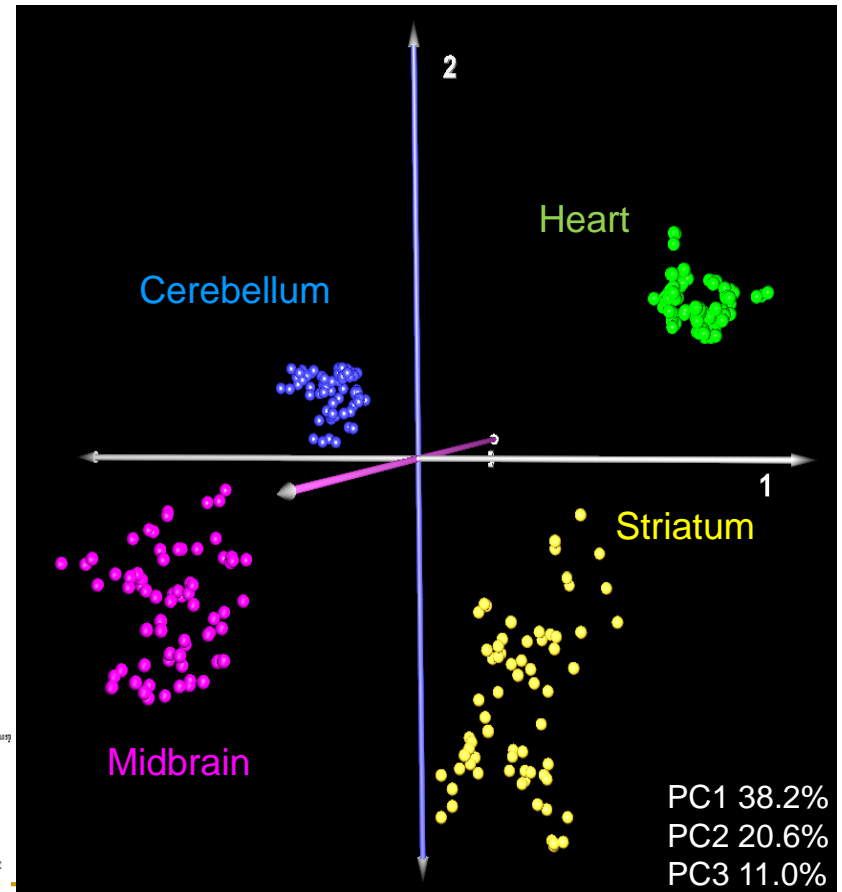

Metabolic Profile = metabolite concentration profile = a metabolic activity fingerprint

Reconstruction of the Mouse Heart Primary Metabolism Network
M.-K. Ioannidi, Master's Thesis, U. of Patras (2015)

MULTI-ORGAN ANALYSIS

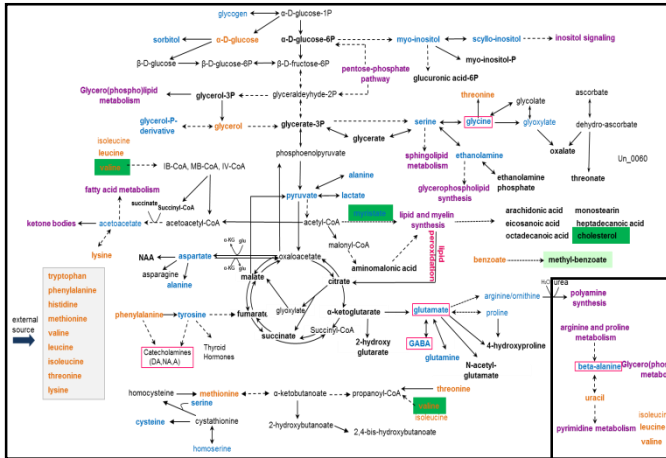

- Cerebellum → 116 metabolite peaks
- Midbrain → 110 metabolite peaks
- Striatum → 54 metabolite peaks
- Heart → 46 metabolite peaks

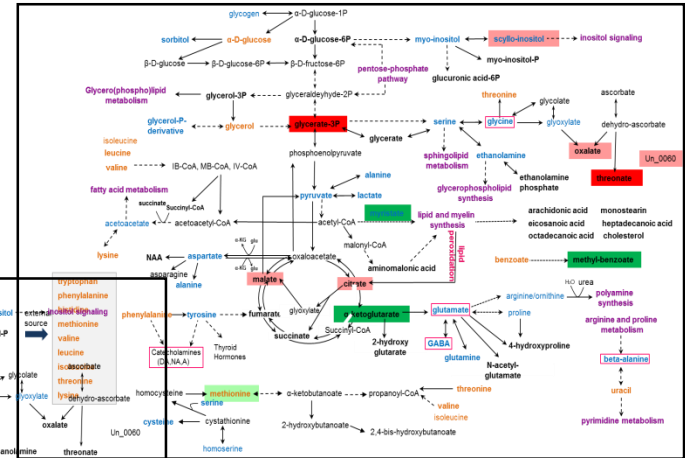

Multivariate Statistical Analysis is based on the 35 common metabolites detected in all tissues
