ABSTRACT

This talk introduces a new lab that aims to be at the forefront of applied statistics and data science. The Statistical Learning Lab (SLL) addresses interdisciplinary research questions from a wide variety of fields, including Social Sciences, Geo-Sciences, Bioinformatics and Biomedical Engineering, Environmental and Transportation Engineering, among others. The Lab's mission is to

- a) collaborate with research groups from FORTH, the University of Crete and other academic institutions in research projects, publications and patents related to advanced quantitative analyses and predictive modeling;
- b) team up with industrial partners, offering consulting services and development of analytics software.
